Dates: 11th / 26th January and 16th February 2018

ONE DAY INTENSIVE TRAINING PROGRAMME for Senior Managers

Overall Objective:

The overall objective of the training is to build consensus and networks to improve and strengthen our education systems for all the stakeholders while improving our business networking for self-reliance after retirement

Cost: 350,000/= (US\$100) per participant (330,000/= group) Venue: Sheraton

Number of resource persons: 3

No of Rapporteurs: 1

Time	Topic	Justification	Specific Objective
Morning Session 8.00am 10.00am	Evidence based testimonies on treatment of cancer, HIV and other diseases and a shot at graceful aging	Managers fall sick at a productive age and fail to accomplish their dreams of leaving a progressive legacy	To take good care of our health and families so as to deliver good services to the community
Break tea			
10.30am 12.30pm	Evidence based subjects linkage for achieving improved science academic performance in secondary schools	STEM is identified as the engine of economic growth for the 21 st Century hence the need of improvement	To organize our academic staff to focus them regarding science fairs and academic performance
Lunch Break			
2.00pm 3.30pm	Vertical and horizontal linkage of the curriculum to value-chains for improved economic growth, incomes and welfare of staff members and the students	There are numerous efforts at improving curriculums and there is need to interrogate the various approaches for the best integrated curriculum	To build consensus so as to create an informed and organized platform to engage Governments on the best integrated curriculum
3.30pm 4.30pm	Integrated application of ICT for efficient management and communication using the web and the net to integrate functions of the school, communication with the students and parents in addition to strengthening the alumni network	The world is moving fast and a leader must be ahead of his juniors to motivate them to move fast. This is the essence of fast-first teaching and fast-first learning. A slow leader demotivates his juniors and the entire system slows down.	To build the instinct for innovation and adaptation to new technologies and to customize them to our education needs so as to motivate teachers, students and parents for increased student intake & management
